Primary Diagnostic Analysis

PREDICTED CONDITION	MODEL CONFIDENCE SCORE
Lung_Opacity	39.86%

Differential Diagnosis Breakdown (Probability Index)

Rank	Diagnostic Indication / Disease	Probability Score
1	Lung_Opacity	39.86%
2	COVID	30.23%
3	Normal	21.15%

MEDICAL DISCLAIMER: This document contains analysis generated by an automated Artificial Intelligence (AI) deep learning diagnostic model. It is intended solely for general reference, research, and clinical decision support. This analysis does NOT constitute definitive medical advice, diagnostic conclusions, or a treatment plan. The prediction confidence scores represent pattern correlation levels, not clinical certainty. Any medical decisions, medication prescriptions, or diagnostic procedures must be reviewed and finalized by a licensed healthcare professional or medical doctor.
